The new Adjustable Micro Tweezers

AM120-A

AM120-A Adjustable Micro Tweezers

The JBC Adjustable Micro tweezers are designed for soldering and desoldering SMD components easily, reducing tool setup time and ensuring perfect alignment of the tips.

Perfect Cartridge Alignment

Finger grip

The concave shape means a snug fit for your finger which prevents it sliding down the handle.

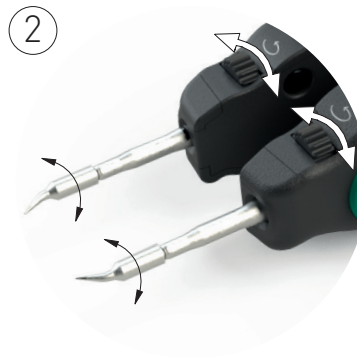

Shortest distance Tip-to-Grip

Provides the greatest handling of the tool, even under microscope.

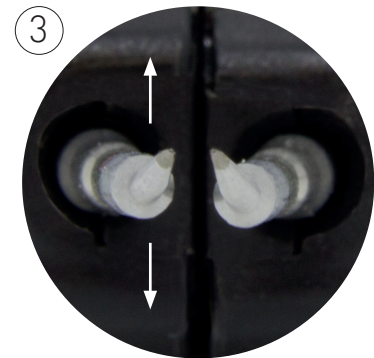

Perfect Cartridge Alignment

Locking
Manual fixing and releasing without any tool.

Rotational alignment
Rotate the cartridges in any direction through the wheels ensuring the cartridges are on the right position.

Vertical alignment
The rear wheel guarantees that the cartridges are equally aligned.

AM-SA Stand - Allows to hold the tool and change cartridges quickly and safely, storing up to 4 models.
